| LO01 | Flowers very little open, quite ugly, without much interest.  | Nel complesso bella pianta                                   | Very abundant blooming, beautiful flowers.                                 | I can only see one photo and it's hard to evaluate, but I think it's a good white flower | the ball shaped flower is very unique which is nice for cut flower          | It has very beautiful greenish-white lotus flowers, and the quantity of the flowers is explosive. It seems to be very suitable for cut flowers.I hope that one day I can plant it in my garden. | nothing to add           | Beautiful flower shape, pure white color, The flowers look like a snow ball and it's really pretty!! | N. A.        | the light yellow lotus with multi petal very rare                       | Flowering lotus with beautifully shaped flowers with many petals. It is a pity that the flower quickly turns brown, probably because of the Italian sun.   | The number of flowers is quite impressive, and each flower has an excessive number of petals. This type of variety requires some 'interaction'—on the first and second days of blooming, it's generally necessary to gently press the petals open by hand, after which the flowers look very beautiful. Some of the pictures show a few flowers from the first day that open naturally and have very full petals. However, by the third day, the petals begin to naturally wither, losing their beauty | Very green foliage with no signs of burning. A flower shaped like a white peony. A beautiful lotus which is generous in flower and has an interesting growth. Big advantage, the flowers emerge from the foliage so as to attract the eye.   | it seems like a steady bloomer!   | good shape one also look very free flower   | nice           | Nice shape & color | Nothing Special   |
| LO02 | Simple white without interest, already existing   | Fiori delicati, pare perdano i petali molto velocemente      | Very abundant flowering, the flowers are similar to other lotus varieties. | I can only see one photo and it's hard to evaluate, but I think it's a good white flower | not sufficiently original in color and shape                                | Single-petaled white lotus flowers.   | nothing to add           | Quite common   | N. A.        | the flower color and shape very common , the quantity of flower is huge | Floriferous lotus with single flowers with few petals. The flower seems to have difficulty opening completely. However, when it does, it offers a pretty spectacle. The greenish, lance-shaped sepals help to highlight the entire flower. | The plant has a large number of flowers, a long blooming period, and a large growth habit. The white flowers have a simple, single-petaled shape typical of common lotus flowers, and they may be pale pink on the first day of blooming.  | Beautiful green foliage without signs of blight. Flowers in large numbers attract the eye of the viewer. A lotus that seems to grow a lot. Too bad this pretty flower doesn't fully blossom to let us see its heart.   | Very nice shape!  | Flower shape Magnolia alike, in my opinion this will be very good in another color.                   | classic beauty | Nice Flower        | Beautiful shape and remarkable blooming                                   |
| LO03 | Double white. It already exists.  | Pianta vigorosa, fiore pieno. In generale bella              | Flowers with lots of petals, abundant blooming.                            | I can only see one photo and it's hard to evaluate, but I think it's a good white flower | common in color and shape but like the big flower size compared with leaves | Double-petaled creamy-white lotus flowers.  | nice flower shape!       | Not bad,but not very impressive  | N.A.         | very common multi petal   | Flowering lotus with flowers of a nice shape with many petals. A curly upper part and a smooth lower part is nice.   | On the second day of blooming, the flower has excellent openness, resembling a dancing shape. The center is pale yellow, and the edges of the petals have a hint of pink. The flowers are large in size, with a high flower count and a long blooming period. I haven't seen a frontal view of the flower on the first day of blooming.  | A beautiful peony-shaped flower. A very flowering lotus. The flowers emerge above the foliage for the greatest pleasure of the viewer. No need to make a bouquet, the lotus will do the work for you by concentrating as many flowers as possible.   | Very good bloomer, large flowers and big leaves, nice.  | beautiful petals count and free flower in the contest.  | Beautiful      | Nice shape Flower  | Nothing Special   |
| LO04 | Flowers too double, it's not very pleasant to look at. You really have to be an amateur, I'm not a fan. | Bel colore, forse un po' povera di fiori rispetto alle altre | Flowers with a large number of petals, moderate flowering.                 | I can only see one photo and it's hard to evaluate, but I think it's a good pink flower  | short flower season   | The heights of the flowers and the leaves are too close to each other.  | interesting flower color | Just not bad   | N. A.        | the color and flower shape are very impress                             | The least floriferous lotus of the contest with flowers of a nice compact shape with many petals. The bud has an original round shape.   | The flowers have many petals and are large in size. The flower buds are slightly taller than the leaves, and the flower quantity is relatively low. The leaves are very large.   | This lotus does not seem generous in the quantity of flowers. It makes up for it with its superb double pink flower. The flowers seem to be lost in the foliage while being a little low. To find the flowers, we have to look for them among the foliage. With more flowers and more height it would be terrible. | It's nice to have someone sending a dark pink one. It's a beautiful flower, unfortunately it does not seem to flower very well. | Love the ball shape and color. Next cross please try to make another hybrid in orange or yellow tone. | Poeny form     | Nice color.        | The mottled character of the petals may be interesting for future hybrids |
